

Placeholder — CV Not Yet Uploaded

This file is a placeholder generated during the build of jackhopkins.dev. It exists only so the “Download CV” links on the site do not return a broken-link error before the real file is in place.

To replace it: export your CV as a PDF named exactly **Jack_Hopkins_CV.pdf**, and place it in the site's **/pdf** folder, overwriting this file. No code or link changes are needed — every “CV” link across the site already points to this filename.

Note: this was generated automatically and is not Jack Hopkins' actual CV.
